

Global Delivery at Nsight, Inc.

World-Class Delivery

Nsight's world-class delivery capabilities bring together our global reach, industrialized assets and deeply skilled technology and industry professionals – all focused on generating measurable business value for our clients through reliable, costs-effective and consistently high quality services. We meet our client's immediate business challenges while simultaneously helping them to define and deliver next-generation innovations through the power of our close, collaborative relationships. Nsight Global Delivery Model is unmatched – delivering management consulting, technology and business process outsourcing services. Our clients are the biggest names in their industries as well as emerging powerhouses.

Delivery Excellence is about making sure we achieve our High Performance promise for our clients. Our environment of continuous improvement helps us drive ever-higher levels of productivity, precision and predictability. Supported by deep industry, technology and business acumen, and by an unsurpassed breadth of industrialized capabilities – including processes, methods, tools, architectures, analytics and metrics – Nsight delivers game-changing solutions to help our clients attain better performance.

Advantages / Benefits of GDM with Nsight, Inc.:

• **BETTER COST**

Nsight, as an organization has access to resources of varying costs that allows us to deliver services to our clients at an optimal cost – which is typically a mix of expensive ‘on-site’ resources combined with cost-effective ‘offshore’ resources.

• **ROUND THE CLOCK DELIVERY**

Nsight has successfully been able to create an environment encompassing round-the-clock delivery for its client, handing off work from one location to another at the end of the ‘day shift’ (‘follow the sun’ model). Thus providing a delivery capacity – twice or even three times the original capacity.

• **DE-RISK OR BUSINESS CONTINUITY PLAN**

Nsight Global locations also provide some degree of ‘risk-proofing’ a customer from natural or man-made disasters such as flooding, earthquake or political unrest - causing disruption in one place. In case of such events, a global company could presumably transfer work to another location where the situation is normal, thus ensuring that work did not get delayed for the client.

• **HIGHER QUALITY**

Quality Standards
